

KITCHEN/DINING ROOM PROJECT

The design of the kitchen aims to create the heart of the house desired by the client, where the client can cook for family and guests. LT System Boffi kitchen is selected with smoked oak veneer finish and includes the island with Carrara marble top like the splashback. It is marked by a beautiful suspended cooker hood, which provides task lighting and space for displaying different items. A wide porcelain floor tile is chosen to unify all the ground floor and make it airy and luminous against the grey-purple tone of the walls. The extendable B&B Italia Athos dining table is chosen for its neat design and has been selected for having frequently people at dinner as it allows seats for twelve people. The beautiful Bertola Wire Chairs matching the bar stools will be embellished with colourful seat cushions to make a more joyful dining area. The interfaced design pattern of Moooi Raimond pendants is reached by the cotton fabric used to dress the windows of the kitchen/dining area and the sunroom.
