

DINING ROOM PROJECT

The dining room has been conceived as a dramatic space where the warm hearth tones and bright and cool sky ones are married to create a sophisticated atmosphere. Entering the room perceptible is the feeling of a space designed to surround and enlighten paintings and artworks; their colours and textures are echoed within the patterns, materials, and colours of this space.

The colour palette of the dining room takes inspiration from the iconic collection of Adele Fendi Bag worn by the owner. Her distinct fashion taste is reflected into the charming and warm atmosphere of the space created for her and her guest. The unique balance between cool and warm, masculine and feminine tones is mirrored by the alternance of straight and sinuous lines, plain and patterned surfaces. Predominant are light brown leather (or terracotta) and white tones, made crisp by accent colours like bright sky blue and deep navy blue and purple.
