

MASTER BEDROOM AND EN-SUITE PROJECT

The master bedroom design is tailored to client's need of having a relaxing and comfortable space. A calming, intimate and informal atmosphere is created by balancing a cool palette with accents of warm tones, soft shapes with more geometric ones, smooth ombre patterns with plainer and simpler ones. The master bedroom and the en-suite are inspired by warm colours, textures and organicity of wood and by the charming soft shades and sharp cuts of precious stones, like agate loved by client. This suggests the chromatic combination of deep and seductive blue with calming and neutral light grey taupe.
