

KITCHEN/FAMILY ROOM PROJECT

The design of the kitchen/dining and playroom reproduces an intimate and informal space for the family and guests entertainment. Opaque laquered surfaces, oak veneer and solid wood, gres laminate flooring and wall tiles respond to the preference for roughness, simplicity and naturalness of materials. Grey is the neutral calming background for a cheerful splash of mustard yellow and warm tones of oak wooden surfaces. Comfortable furniture with neat and clear shapes, featuring natural cotton upholstery, are tailored to a child-friendly space like this. Indoor plants create a relation with the green outside and add naturalness to the neutral grey background. Softer lines are introduced by iconic pieces of mid-century Scandinavian design like the Womb Armchair designed by Eero Saarinen and the Series 7 chairs by Arne Jacobsen, and by more contemporary ones like Brokis Muffin table lamp and Ay illuminate bamboo pendants characterized by a sinuous silhouette. Family portraits are displayed on the wall to suggest the idea of the family nest. Following the owners' passion for reading, numerous books are visible, and with their accent colours brighten up the neutral background.
