

LIVING/STUDY ROOM PROJECT

The room is tailored to client's need of a relaxing and calming space by using delicate pastel tones and soft shapes, balanced by few more sophisticated lines and accents of black, which gives character and makes elements stand out from the composition. This soft pastel palette of dusty pink, soft mint, grey and white gives a feminine charm to this contemporary space, conceived as an informal room but made precious by scattered decorative pieces, artistic paintings and iconic furniture. A floral patterned handcrafted wool rug ties together Edra Cipria Chair, Pedrera coffee table, side table and the beautiful and comfortable Suita Sofa designed by Antonio Citterio for Vitra. All these pieces characterize the room with sleek modern lines and their arrangement appears neat and organized to avoid clutter and confusion. The layered curtains are ripple fold, which have a crisp, clean but still soft effect, enhanced by the bottom sweeping on the floor and the semi-transparency of the voile panels for a more relaxing and gentle look.
